

Máquina Virtual

Virtual Box

Windows 11

Heloíse M. de Castro

**Para criar uma
máquina virtual, é
necessário clicar no
botão azul "Novo"
localizado no topo
da tela.**

Após, aparecerá essa tela, onde será essencial nomear o computador virtual, selecionar uma pasta, iso e marcar o quadradão "Pular Instalação Desassistida".

Ficará assim.

As gigas também podem ser alteradas de acordo com a necessidade.

A memória base, na maioria das vezes não é alterada, 4.096 MB é o padrão. O número de CPU's pode ser modificado de acordo com a necessidade.

Ao final é só pressionar o mouse em "Finalizar".

**Para iniciar a
instalação do S.O
Windows 11,
deve-se clicar em
sua máquina.**

Etapas para a configuração do S.O

Preencher de acordo com o idioma que preferir.

Clicar em "Instalar agora".

Esperar a instalação.

**Máquina carregando para o
término das configurações.**

VirtualBox

Preparando-se

**O Windows 11 está
pronto para o uso!**
